

Driver

Attention Please

- Please double click "EzCoding_Setup" to install the supporting software.
- If your local system is [windows 8.1 and later](#), please disable driver signature first .

Disable Driver Signature Enforcement Guide for Win 8 and later

1. Right click on "System" icon on your start manu of Win 10, choose "Settings".
2. Choose "Update & security".
3. Choose "Recovery" left-side, and "Restart now" right-side under "Reset This PC".
4. After a loading screen, you may see 3 or more options, choose "Troubleshoot".
5. Choose "Advanced options".
6. Choose "Startup Settings".
7. Now you can see "Restart to change Windows options such as:", click "Restart" on the right below.
8. After reboot, you may see screen titled "Startup Settings", follow screen instruction to choose "Disable driver signature enforcement". That is, press 7 or F7 on the keyboard.
9. At last, you can follow the "sfpccodingbox.com Driver Install Guide" to retry installing driver.

For example:

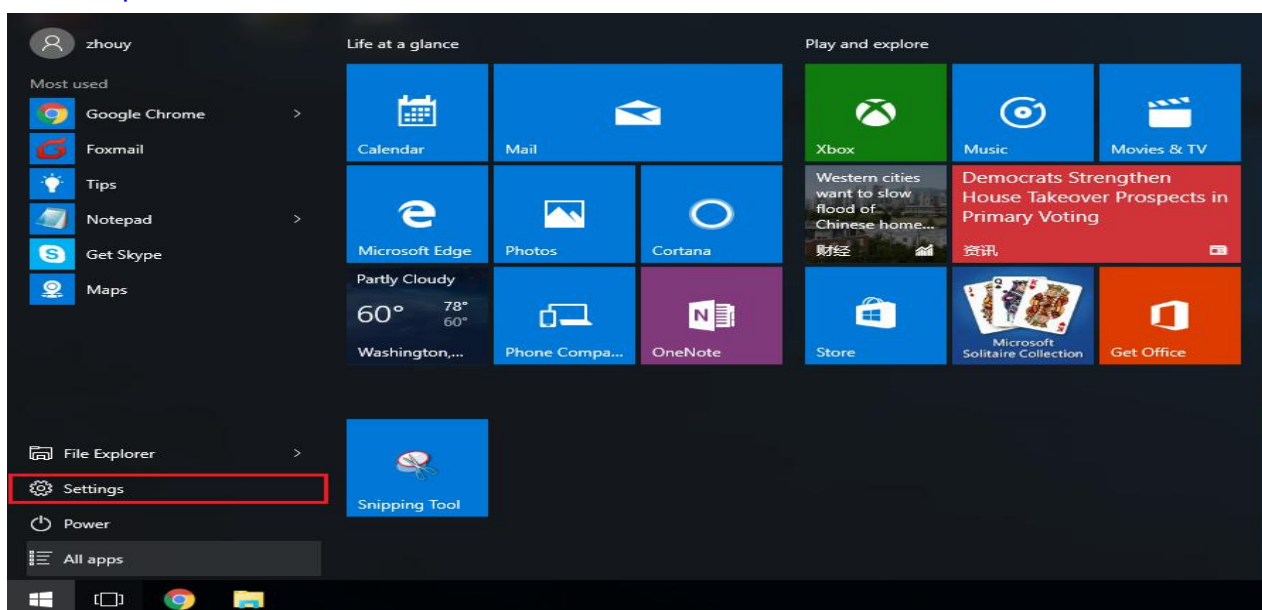

Figure 1: choose "Settings"

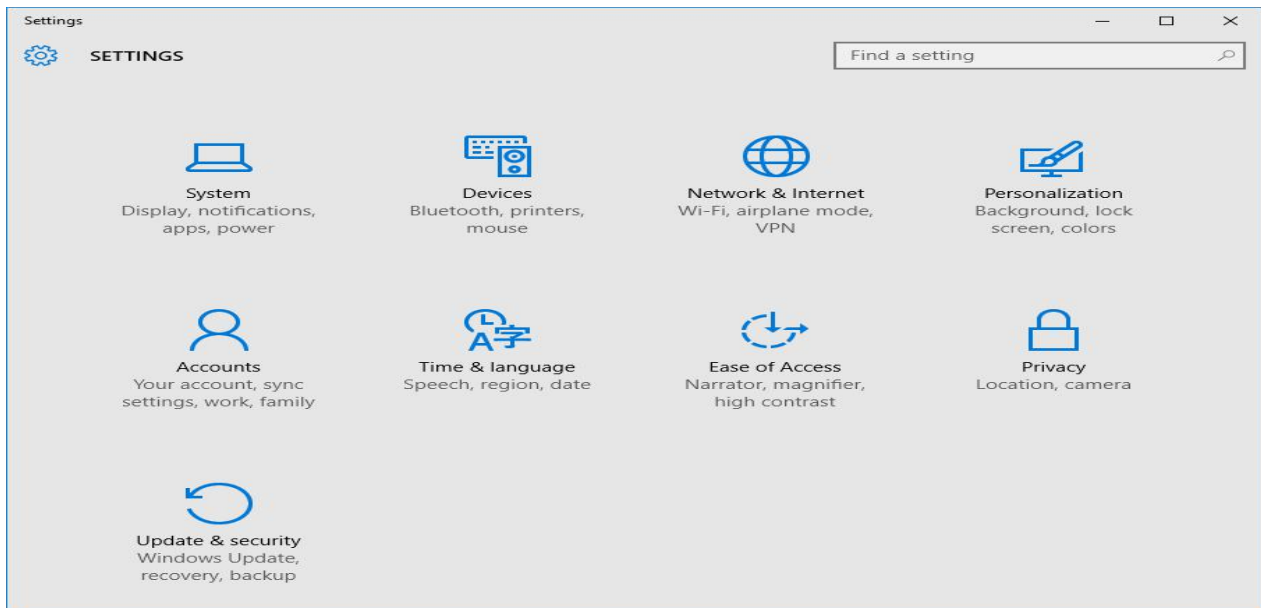

Figure 2: choose "Update & security"

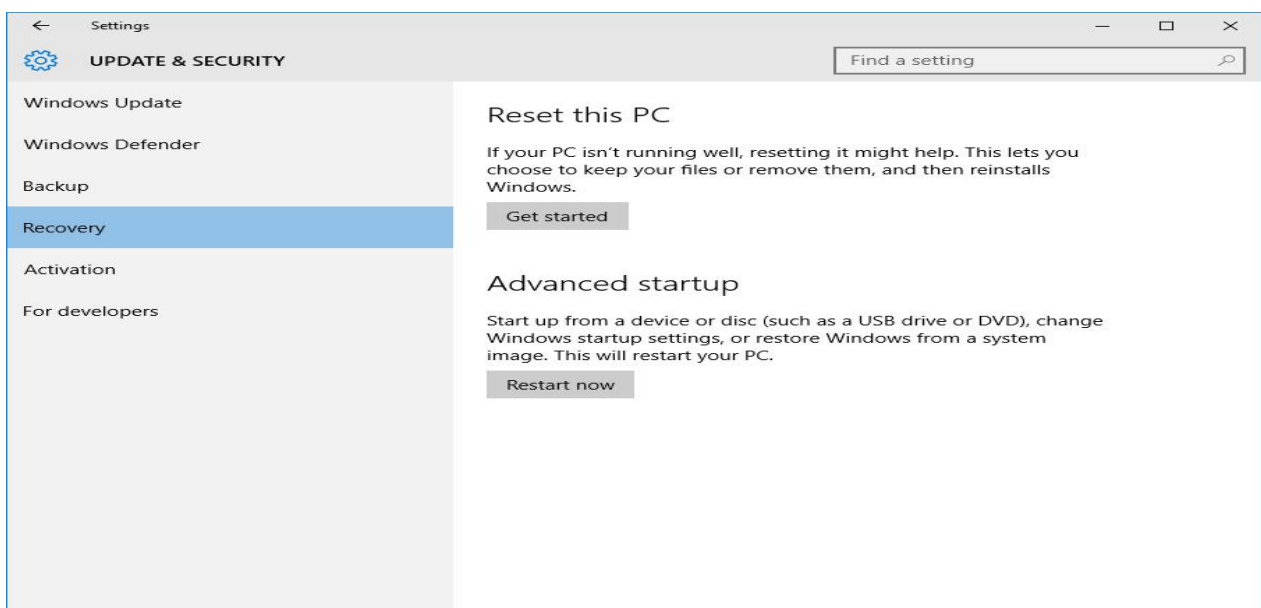

Figure 3: choose "Restart now"

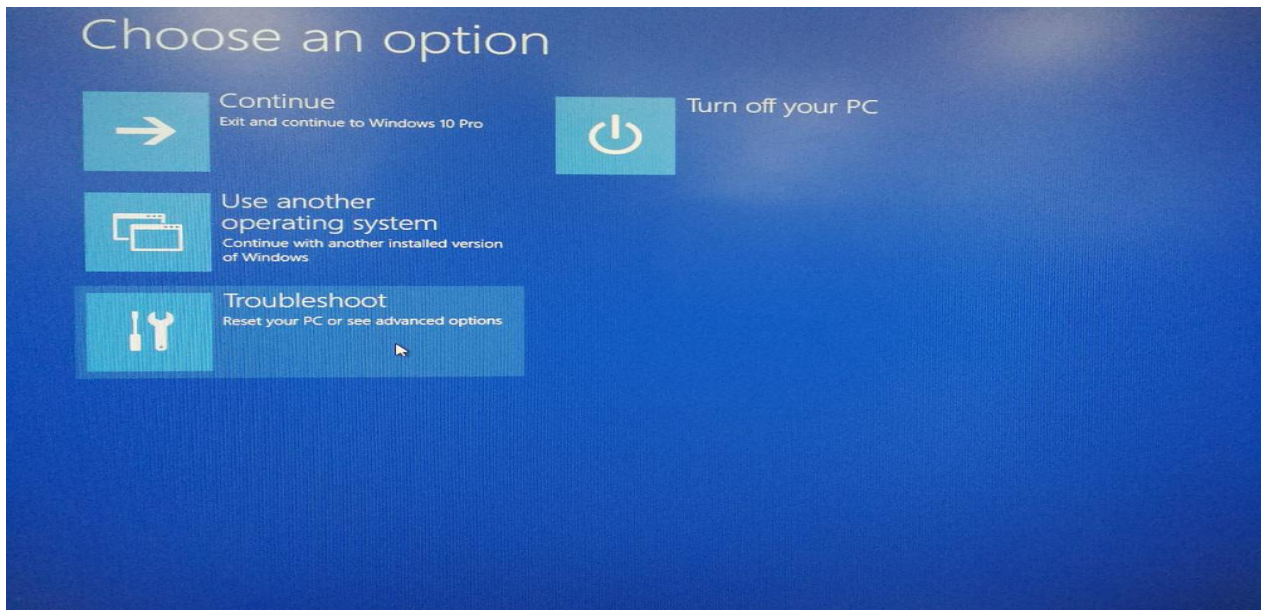

Figure 4: choose "Troubleshoot"

Figure 5: choose "Advanced options"

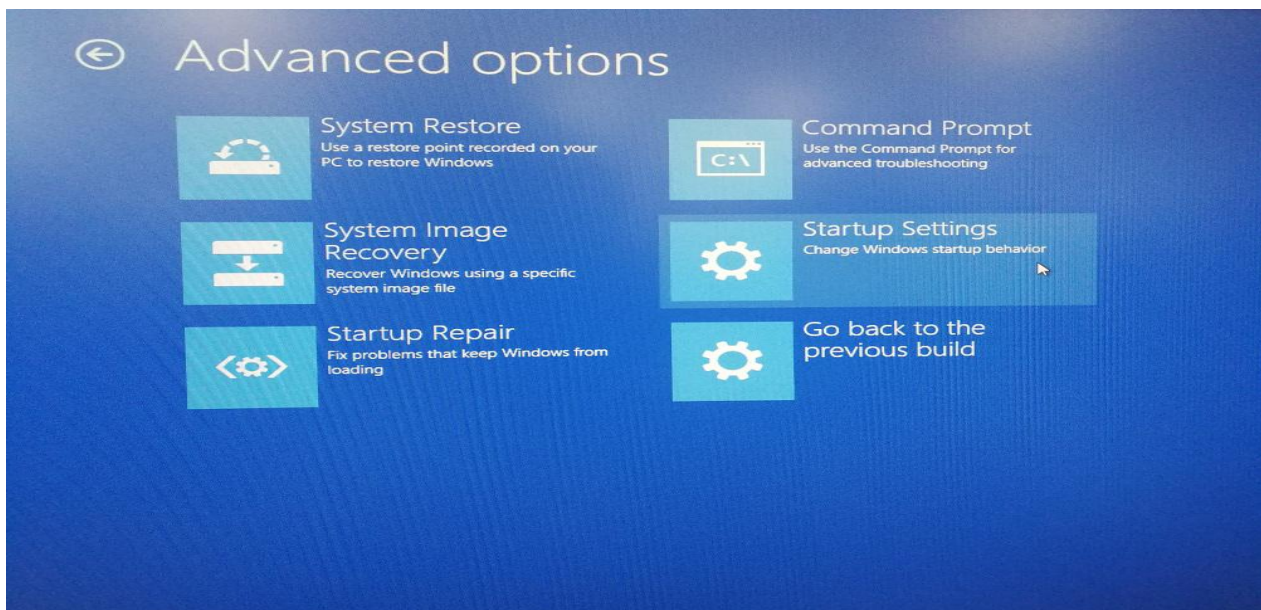

Figure 6: choose "Startup Settings"

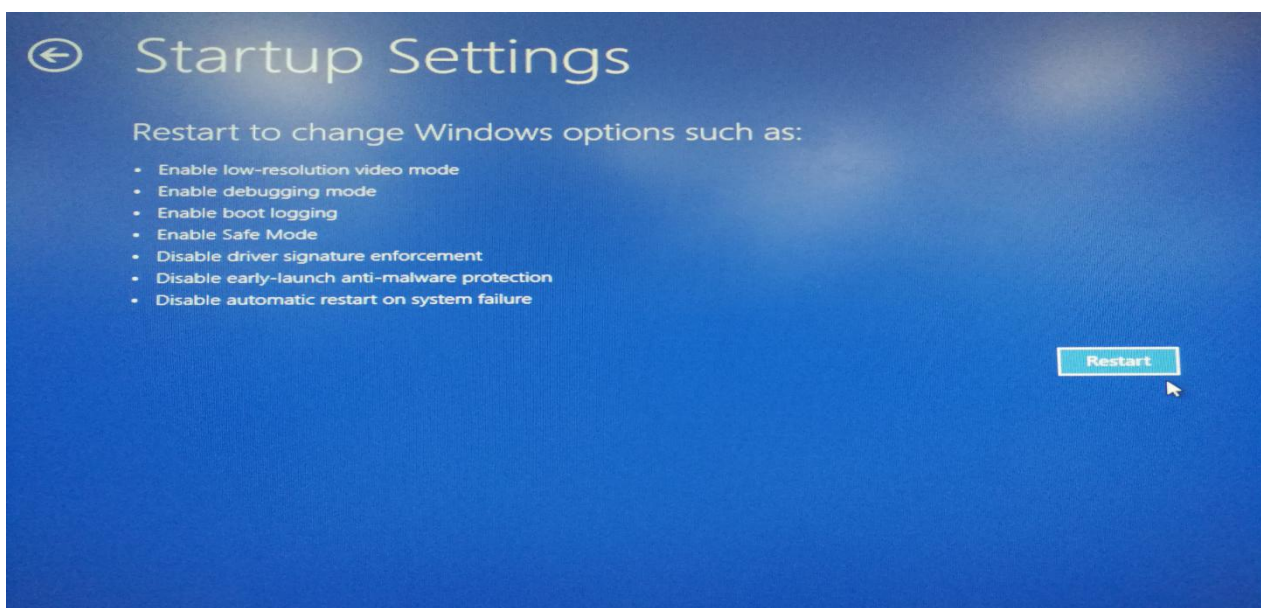

Figure 7: choose "Restart"

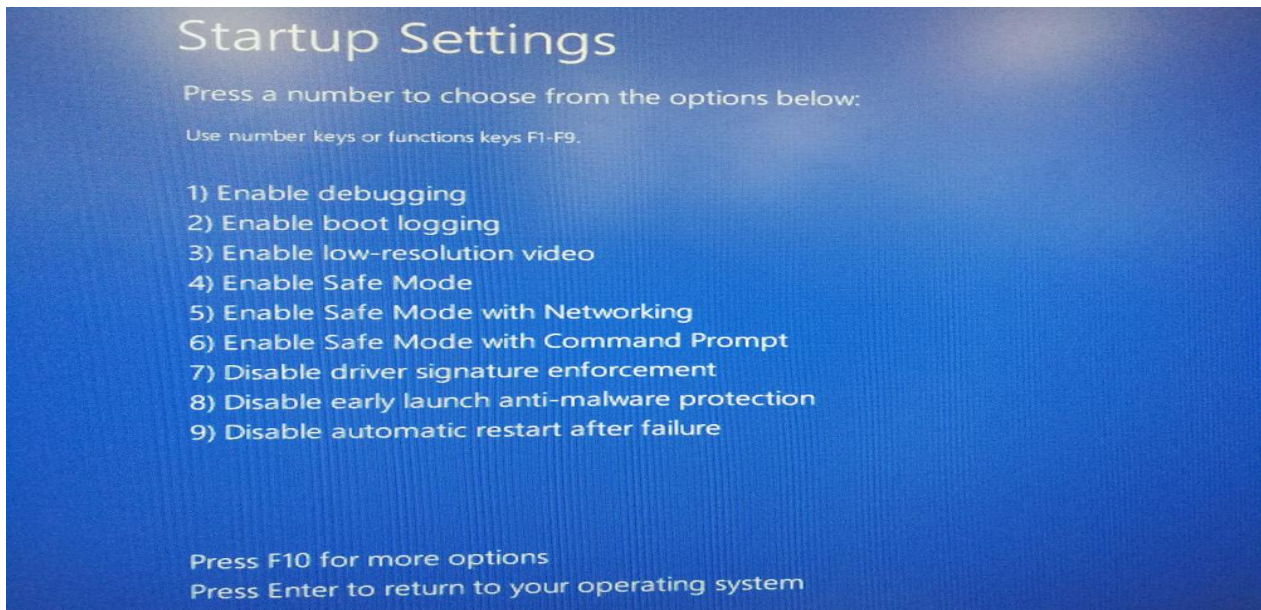

Figure 8: Press "7" or "F7" on the keyboard

Support

If you have any problem, please contact us through email support@sfpcodingbox.com. We will deal with it as soon as possible. If you can provide a screenshot of the error message, it will be very helpful to us.
